

A joint collaboration between Stark County Public Health Agencies:

Alliance City Health Department

Canton City Public Health

Massillon City Health Department

Stark County Health Department

Stark County, Ohio

September 8, 2020 Epi Report

All data contained is preliminary and is subject to change as more information is reported to Ohio Department of Health (ODH). Data presented in this document is based on data as of 09.08.2020 12:00pm (for Stark County data) and/or 2:00pm (for Ohio data). Cases from previous days are likely to change as more information is entered. Caution should be exercised as data is subject to change.

Stark County Epi Situational Report - COVID-19

Table 1 as of: 09/08/2020 2:00PM

Next report scheduled: 09/11/2020

Cases Reported to Stark LHDs		
Data as of 09.08.2020 1200		
Positive/Confirmed	2332	
Hospitalized	308	13.21%
ICU Admissions	66	2.83%
Deaths in Confirmed Cases	152	6.52%
Probable Cases	163	
Deaths in Probable Cases	4	

Cases Reported to ODH		
Data as of 09.08.2020 1400		
Positive/Confirmed	125,144	
Hospitalized*	13,967	11.16%
ICU Admissions*	3042	2.43%
Deaths in Confirmed Cases	4009	3.20%
Probable Cases	6848	
Deaths in Probable Cases	289	

*Hospitalized & ICU includes confirmed & probable

Descriptive Statistics for Stark County Confirmed Cases

Gender			
	Confirmed Cases		Deaths
Male	995	42.7%	76
Female	1333	57.2%	76
Unknown	4	0.2%	0
Total	2332		152

Ethnicity			
	Hispanic	Non-Hisp	Unknown*
Count	130	1683	519
%	6%	72%	22%

Race					
	White	Black	Asian/Pacific Islander	Other	Unknown*
Count	1594	290	19	145	284
%	68%	12%	1%	6%	12%

*Unknown counts includes refused to answer responses

Illness Information for Stark County Confirmed Cases-Cumulative Counts

Hospitalized		
Yes	308	13.2%
No	2014	86.4%
Unknown	10	0.4%

Pre-existing Conditions		
Yes	1258	54%
No	1074	46%

If hospitalized, in ICU?		
Yes	66	21%
No	242	79%

Discharged from Hospital		
ICU	51	
Other	167	

Some cases may be discharged due to death.

Signs & Symptoms in Confirmed Stark County Cases
Graph 1

Graph 1 shows the incidence of signs and symptoms reported in confirmed cases of COVID-19 in Stark County. Two symptoms that are similar are subjective fever where in a patient felt feverish and fever in which is defined as a fever of >100.4F (38C). Additional symptoms may be added in the future as prevalence increases.

Total Number of Confirmed & Probable Cases by Age Group in Stark County
Graph 2

Graph 2 shows the cumulative number of laboratory-confirmed and probable cases and deaths in those cases by age group. Age groups may be broken down further as new cases emerge. There are two probable cases in which date of birth is currently unknown and not shown in graph above.

Graph 3 shows a breakdown of confirmed cases by week by age groups. As with all data contained in this report, caution is advised when looking at the past 2-3 weeks of data due to delays in testing results.

Graph 4 shows the EpiCurve which displays the total number of laboratory-confirmed cases per week, based on the illness onset date for Stark County and Ohio. If the illness onset date is not available, the earliest known date is utilized, which could include the date the specimen was collected, the date of the test results or the date reported to the local health department. Counts will change as additional information is collected. Totals may not equal the totals on Table 1 depending on when data was accessed. Stark County’s first confirmed case reported an illness onset date of 2/25/2020, while Ohio had cases prior to 2/23/2020, those are not included. **This data only includes data up until 11:00am on 09/08/2020.**

21 Day EpiCurve of Confirmed COVID-19 Cases in Stark County and Ohio by Illness Onset
Graph 5

To help highlight short-term daily changes, Graph 5 shows daily counts of laboratory confirmed cases for a 21-day period.

Count of Deaths in Confirmed Cases by Week
Graph 6

Graph 6 is a breakdown of death counts in laboratory-confirmed cases by week in which the death occurred. Includes only deaths reported to the local health department as of 11:00am on 09/08/2020. This isn't an automated process which is why it may be a week or longer for a death to be documented.

Rate of Confirmed and Probable Cases by Health Jurisdiction
Graph 7

Health Jurisdiction	Probable Cases	Confirmed Cases	Total
Alliance	4	123	127
Canton	47	475	522
Massillon	11	259	270
Stark County	101	1475	1576

Rates=(case count/population)*100000

Graph 7 shows the rate of cumulative confirmed and probable cases by Stark County jurisdictions. Alliance, Canton and Massillon jurisdictions covers those within those particular city limits. Stark County jurisdiction covers all other areas outside of those three city limits. Rates calculated by 2018 population census data.

Rates of Confirmed Cases by Population
Graph 8

Counts of Cases	Ohio	Stark County
Confirmed	125,144	2,332
Hospitalized	13,856	308
Deaths	4,009	152

Rates based on 2018 population from data.census.gov.
Rates=(count/population)*100000

Graph 8 shows the rates dependent on the 2018 population in Ohio and Stark County. This graph works to compare cases in different populations by normalizing the cases per 100,000 persons.

- Ohio's rate of laboratory confirmed cases is 1.7x higher than those in Stark County.
- Ohio's rate of laboratory confirmed cases who require hospitalization is 1.4x higher than Stark County's rate.
- Stark County's rate of death due to COVID-19 complications is 1.2x higher than Ohio's rate.

Closed Confirmed Cases
Graph 9

Graph 9 is the counts of confirmed cases closed, either due to closed/recovered or closed due to death. Stark County has a total of 1582 cases closed of which 152 (10%) are due to death.

Cases can be closed for the following reasons:

- The person passed away.
- Symptoms have resolved in that case.
- The person is no longer being followed by the local health department.

Percentage Breakdown of Confirmed Cases
Graph 10

Graph 10 shows a breakdown of categories in confirmed cases. Healthcare workers account for 16% of the confirmed cases while long-term care residents account for 15% of confirmed cases. The remaining 69% do not belong in either of those categories. The percentages are based off of those that were affirmatively indicated to be either a healthcare worker or long-term care resident.

Confirmed Cases Linked to a Known Cluster
Graph 11

A cluster is defined as 2 or more cases with a common time and place of exposure. In Stark County, commonly these are work place, congregate living or family event/party settings. Additionally, cases that were exposed to original case members of the cluster and they subsequently became ill are also then linked to the original cluster.

Background from www.cdc.gov: Coronavirus disease 2019 (COVID-19) is a respiratory illness that can spread from person to person. The virus that causes COVID-19 is a novel coronavirus that was first identified during an investigation into an outbreak in Wuhan, China.

Confirmed Cases

- Positive for SARS-CoV-2 RNA (with or without meeting epi criteria and/or clinical criteria)

Probable Cases

- Positive for SARS-CoV-2 Antigen (via FDA-approved test³) and meeting either the epi criteria or clinical criteria
- Positive for SARS-CoV-2 Antibody (via FDA-approved test³) and meeting either the epi criteria or clinical criteria
- No laboratory testing and meeting both the epi criteria and clinical criteria
- Positive for SARS-CoV-2 Antigen or Antibody (via non-FDA-approved test) and meeting both the epi criteria and clinical criteria
- Death certificate listing COVID-19 as a cause of death with no PCR lab testing

Counts and rates are based on date of illness onset. If onset date is unknown, the earliest known date is utilized. Any rates based on counts less than 10 are considered unreliable and caution should be exercised when interpreting. Due to testing restrictions, data may be skewed. Report compiled by Canton City Public Health.
