

**A joint collaboration between Stark County Public Health Agencies:**

Alliance City Health Department

Canton City Public Health

Massillon City Health Department

Stark County Health Department

Stark County, Ohio

January 27, 2022 Epi Report

**COVID-19 Snapshot  
Stark County, Ohio  
as of 12:00pm  
January 27, 2022**

**January 6, 2022-January 19, 2022  
Number of Confirmed & Probable Cases in Stark County  
3619  
Rate per 100,000 in Stark County Population  
976.5  
CDC Level of Community Transmission: High  
1/20/2022-1/26/2022**

**Confirmed Cases**

Total:  
64,691

Active/Open Cases:  
6,140

Closed:  
(includes Deaths)  
58,551

Closed due to Death:  
1,319

**Probable Cases**

Total:  
12,914

Active/Open Cases:  
1,118

Closed:  
(includes Deaths)  
11,796

Closed due to Death:  
209

**Hospitalized  
Confirmed &  
Probable Cases**

Yes:  
(includes ICU)  
3,864

Yes, ICU:  
192

Discharged:  
1,612

**Age Range**

Confirmed Cases:  
<1-108

Hospitalized in Confirmed Cases:  
<1-105

Deaths in Confirmed Cases:  
21-108

All data contained is preliminary and is subject to change as more information is reported to Ohio Department of Health (ODH). Data is as of 11:00pm on 1/26/2022. Cases from previous days are likely to change as more information is entered. Caution should be exercised as data is subject to change. Numbers may differ from ODH depending on time data was accessed.

**Stark County Epi Situational Report - COVID-19**

**Table 1 as of: 1/27/2022 12:00PM**

Next report scheduled: 2/3/2022

Cases Reported to Stark LHDs		
Data from 11/3/2021-1/27/2022 (12-weeks)		
Positive/Confirmed	23,933	
Hospitalized	1,037	4.33%
ICU Admissions	11	0.05%
Deaths in Confirmed Cases	239	1.00%
Probable Cases	5,303	
Deaths in Probable Cases	29	

Cases Reported to Stark LHDs		
Cumulative Data as of 1/27/2022 12:00		
Positive/Confirmed	64,691	
Hospitalized	3,776	5.84%
ICU Admissions	188	0.29%
Deaths in Confirmed Cases	1,319	2.04%
Probable Cases	12,914	
Deaths in Probable Cases	209	

**Descriptive Statistics for Stark County Confirmed Cases: Data from 11/3/2021-1/27/2022**

Gender			
	Confirmed Cases		Deaths
Male	10,606	44.3%	139
Female	13,267	55.4%	100
Unknown	60	0.3%	0
Total	23,933		239

Ethnicity			
	Hispanic	Non-Hisp	Unknown*
Count	405	17,296	6,232
%	1.7%	72.3%	26.0%

Race							
	White	Black	Asian/Pacific Islander	American Indian/Alaskan Native	Other	Multiple Races	Unknown*
Count	16,305	2,054	171	36	622	468	4,277
%	68.1%	8.6%	0.7%	0.2%	2.6%	2.0%	17.9%

\*Unknown counts includes refused to answer responses

**Hospitalization Information for Stark County Confirmed Cases-Cumulative Counts**

Hospitalized			If hospitalized, in ICU?			Discharged from Hospital		
Yes	3,776	5.8%	Yes	188	5%	ICU	136	
No	56,231	86.9%	No	3,588	95%	Other	1436	
Unknown	4,684	7.2%					Some cases may be discharged due to death.	

**Stark County Vaccination Update as of 1/27/2022**

Current Vaccination Groups Eligible	Vaccine Started	Vaccine Completed
Persons aged 5 and over	Count: 209,131	Count: 194,512
	56.43% of population	52.48% of population

Graph 1 shows the cumulative number of confirmed cases by age group for 2021 and 2022. There are 2 from 2021 and 2 from 2022 confirmed case in which date of birth is currently unknown and not shown in graph above.

Graph 2 shows a breakdown of confirmed cases by week by age groups. As with all data contained in this report, caution is advised when looking at the past 2-3 weeks of data due to delays in testing results. Only 12 weeks of data is shown in graphs below. Please be aware that all 4 graphs have differing y-axis (vertical axis) to best show differences in case counts from week to week.

# EPIDEMIOLOGICAL REPORT ON COVID-19

Graph 3 shows the EpiCurve which displays the total number of laboratory-confirmed cases per week, based on the illness onset date for Stark County. If the illness onset date is not available, the earliest known date is utilized, which could be the date the specimen was collected, the date of the test results or the date reported to the local health department. Counts will change as additional information is collected. Stark County’s first confirmed case reported an illness onset date of 2/25/2020 but graph only contains 52 weeks of data.

To help highlight short-term daily changes, Graph 4 shows daily counts of laboratory confirmed cases for a 21-day period.

Count of Deaths in Confirmed Cases by Week  
Graph 5

Graph 5 is a breakdown of death counts in laboratory-confirmed cases by week in which the death occurred. Includes only deaths reported to the local health department as of 12:00 pm on 1/27/2022. This isn't an automated process which is why it may be a week or longer for a death to be documented. **Please see last page of report for additional information regarding deaths.**

Graph 6 shows the breakdown in deaths in confirmed and probable cases by age group. Additional age groups will be added as needed.

Count of Deaths in Confirmed & Probable Cases by Age Group  
Graph 6

Rate of Confirmed and Probable Cases by Health Jurisdiction-2022 only

Graph 7

	Probable Cases	Confirmed Cases	Total
Alliance	125	692	817
Canton	382	1865	2247
Massillon	141	925	1066
Stark County	1497	6096	7593

Rates=(case count/population)\*100000

Graph 7 shows the rate of cumulative confirmed and probable cases by Stark County jurisdictions. Alliance, Canton and Massillon jurisdictions covers those within those particular city limits. Stark County jurisdiction covers all other areas outside of those three city limits. Rates calculated by 2018 population census data.

Rates of Confirmed Cases by Population

Graph 8

Counts of Cases	Ohio	Stark County
Confirmed	1,987,476	64,691
Hospitalized	100,100	3,776
Deaths	32,489	1,319

Rates based on 2018 population from data.census.gov.  
Rates=(count/population)\*100000

Graph 8 shows the rates dependent on the 2018 population in Ohio and Stark County. This graph works to compare cases in different populations by normalizing the cases per 100,000 persons.

- Stark County’s rate of laboratory confirmed cases is 1.0x higher than those in Ohio.
- Stark County’s rate of laboratory confirmed cases who require hospitalization is 1.2x higher than Ohio’s rate.
- Stark County’s rate of death due to COVID-19 complications is 1.3x higher than Ohio’s rate.

To give health jurisdictions a clearer picture of cases within the 3 city limits and outside of those city limits, new graphs have been added. Graphs 9.1, 9.2, 9.3 are for each of the 3 city centers in Stark County. Graph 9.4 is for cases that occurred in residents outside of the 3 city limits. Please be aware that all 4 graphs have differing y-axis (vertical axis) to best show differences in case counts from week to week.

Weekly EpiCurve of Confirmed COVID-19 Cases in Massillon City by Illness Onset

Onset  
Graph 9.3

Weekly EpiCurve of Confirmed COVID-19 Cases outside 3 city limits by Illness Onset

Onset  
Graph 9.4

Background from [www.cdc.gov](http://www.cdc.gov): Coronavirus disease 2019 (COVID-19) is a respiratory illness that can spread from person to person. The virus that causes COVID-19 is a novel coronavirus that was first identified during an investigation into an outbreak in Wuhan, China.

Case definitions revised 9/22/2021

**Confirmed**

- Meets confirmatory laboratory evidence.
- o NOTES: Asymptomatic infections are reportable as confirmed cases. In some cases, a SARS-CoV-2 genomic sequencing result may be available without an associated positive PCR result. These records should be classified as a confirmed case; however, public health action may be limited as SARS-CoV-2 genomic sequencing assays are non-diagnostic tests and generally not CLIA-validated.

**Probable**

- Meets presumptive laboratory evidence AND was reported on or after November 1, 2020; OR
- o For reports received prior to November 1, 2020: meets presumptive laboratory evidence AND either clinical criteria OR epidemiologic linkage; OR
- Meets clinical criteria AND epidemiologic linkage with no confirmatory or presumptive laboratory testing performed for SARS-CoV-2; OR
- Meets vital records criteria with no confirmatory laboratory evidence for SARS-CoV-2.

Counts and rates are based on date of illness onset. If onset date is unknown, the earliest known date is utilized. Any rates based on counts less than 10 are considered unreliable and caution should be exercised when interpreting. Due to testing restrictions, data may be skewed. Report compiled by Canton City Public Health.

Data is sourced from: [coronavirus.ohio.gov](http://coronavirus.ohio.gov), ODH data warehouse, and [census.gov](http://census.gov). “These data were provided by the Ohio Department of Health. The Department specifically disclaims responsibility for any analyses, interpretations or conclusions.”

Beginning March 2, 2021, ODH changed from using Ohio Disease Reporting System (ODRS) for mortality data to utilizing Electronic Death Registration System (EDRS) data. This allows only deaths which have been verified by the CDC’s National Center for Health Statistics (NCHS) to be included on the ODH website. This data is not updated daily. For the time being, Stark County will continue to utilize mortality data for ODRS with the disclaimer that data is considered preliminary and subject to change.
